

# Bez Ambar

## Ring Size Guide

This page was designed to help you determine your ring size. When printing out this page make sure to uncheck the „fit to page“ option in the print dialouge box or select „actual size“. Ensure that you are printing the page at 100% or full scale. To cofirm that you have printed the page properly use a ruler to measure the sample below. It should measure 2 inches.

Once you have verified that your page is printed out correctly follow these steps to determine your ring size.

- Take a ring you already own that fits your finger perfectly. Make sure the ring that you are measuring fits the finger on which you will be wearing your Bez Ambar ring.
- Align your ring with one of the circles below that best matches your ring in size. The inner edge of your ring should align with the outer edge of the circle.
- If your ring appears to be between two sizes and you are uncertain as to which one you should pick, we suggest you choose the larger size. Quarter sizes are available for special orders.

\*If you are ordering a ring with a wider band we recommend going with a ½ size larger.
